

Polymorphism

Recursion

Java Collections (i.e. already implemented linked list, array list, hash map, and tree map)

Data structure: You have to know how to **implement**: linked list, array list, queue and stack.

Java Comparable and Comparator

So open eclipse and make sure that you are familiar enough with it (debugging ...etc.)

Make sure to write code, not just solve it in your mind (e.g. implement array list, or implement queue ... etc.)
